Contents

Volume 141 (1984)

Degradation of DNA by silicic acid (MRLett 0593)
by Qamar Rahman, N.K. Alvi, R.Y. Rizvi and S.M. Hadi (Aligarh) 1– 5
Effect of storage at 4° on prepared Salmonella/microsome test plates (MRLett 0599)
by C.A. Stanton, S.E. Riley and R.C. Garner (York) 7– 9
The direct mutagenic activity of α,ω-dihalogenoalkanes in *Salmonella typhimurium*
Strong correlation between chemical properties and mutagenic activity (MRLett 0602)
by W. Buijs, A. van der Gen, G.R. Mohn and D.D. Breimer (Leiden) 11–14
Induction of aneuploidy by oncodazole (nocodazole), an anti-tubilin agent, and acetone (MRLett 0595)
by F.K. Zimmermann, V.W. Mayer and I. Scheel (Darmstadt) 15–18
Genetic and biochemical investigation on chloral hydrate in vitro and in vivo (MRLett 0596)
by G. Bronzetti, A. Galli, C. Corsi, E. Cundari, R. Del Carratore, R. Nieri and M. Paolini (Pisa) 19–22
Hydrogen peroxide-dependent activation of benzidine to mutagenic species (MRLett 0598)
by P. David Josephy and R.E. Subden (Guelph) 23–28
Effects of DNA-repair-deficient mutants on somatic and germ line mutagenesis in the UZ system in *Drosophila melanogaster* (MRLett 0603)
by Åsa Rasmuson (Umeå) 29–33
Human fecal fractions can produce nuclear damage in the colonic epithelial cells of mice (MRLett 0600)
by K. Suzuki and W.R. Bruce (Toronto) 35–39
Apurinic/apyrimidinic endonuclease activities appear normal in the CHO-cell ethyl methanesulfonate-sensitive mutant, EM9 (MRLett 0594)
by M. La Belle, S. Linn and L.H. Thompson (Berkeley and Livermore) 41–44
High frequencies of chromatid aberrations produced during G_2 in human lymphocytes by very low doses (0.025–0.4 Gy) of X-rays in combination with inhibitors of DNA synthesis (MRLett 0601)
by H.C. Andersson and B.A. Kihlman (Uppsala) 45–48
Sister-chromatid exchange induction by sodium selenite: Reduced glutathione converts Na_2SeO_3 to its SCE-inducing form (MRLett 0605)
by James H. Ray (New York) 49–53
Chromosome aberrations and sister-chromatid exchanges (SCEs) in peripheral blood lymphocytes of patients suffering from poliomyelitis (MRLett 0608)
by Anita Bhatnagar, Rajni Rani and P.K. Ghosh (New Delhi) 55–58
The human lymphocyte in vitro cytogenetic assay: positive and negative control observations on ~ 30 000 cells (MRLett 0610)
by C.R. Richardson, Catherine A. Howard, Tim Sheldon, Julie Wildgoose and M.G. Thomas (Alderley Park) 59–64
Assembling a battery of assays to predict carcinogenicity: a case study (MRLett 0597)
by Herbert S. Rosenkranz, Julia Pet-Edwards, Vira Chankong and Yacov Y. Haimes (Cleveland) 65–68
Novobiocin-mediated inhibition of polymerization and ligation of DNA in vitro (MRLett 0612)
by P.J. Meechan, S. Killpack and J.E. Cleaver (San Francisco) 69– 73
Preferential repair of nuclear matrix associated DNA in xeroderma pigmentosum complementation group C (MRLett 0615)
by L.H.F. Mullenders, A.C. van Kesteren, C.J.M. Bussmann, A.A. van Zeeland and A.T. Natarajan (Leiden) 75– 82
Frameshift mutagenesis by acridines in wild-type, uvrB and polA strains of *Salmonella typhimurium* with and without plasmid pKM101 (MRLett 0609)
by Lynnette R. Ferguson and Donald G. MacPhee (Auckland and Bundoora) 83– 88
Chromosome aberrations and sister-chromatid exchange frequencies in pathology staff occupationally exposed to formaldehyde (MRLett 0614)
by E.J. Thomson, S. Shackleton and J.M. Harrington (Edinburgh and Birmingham) 89– 93

Induction of chromosome aberrations and sister-chromatid exchanges in CHO-K1 cells by *o*-phenylphenol (MRLett 0616)
by Sumiko Tayama-Nawai, Seiji Yoshida, Toshiko Nakao and Kogo Hiraga (Tokyo) 95- 99
Ultraviolet light and mitomycin C induced sister-chromatid exchanges in fibroblasts from patients with retinoblastoma (MRLett 0619)
by T. Takabayashi, M.S. Lin and M.G. Wilson (Los Angeles) 101–104
Mouse spot tests with dimethylbenz[*a*]anthracene with and without phenobarbital pretreatment (MRLett 0607)
by Tohru Shibuya and Tetsuro Murota (Kanagawa) 105–108
Mutagenicity of instant coffee on cultured Chinese hamster lung cells (MRLett 0606)
by Fumiko Nakasato, Michie Nakayasu, Yuki Fujita, Minako Nagao, Masaaki Terada and Takashi Sugimura (Tokyo) 109–112
Collagenase perfusion of rat liver induces DNA damage and DNA repair in hepatocytes (MRLett 0604)
by C.F. Cesarone, E. Fugassa, G. Gallo, A. Voci and M. Orunesu (Genoa) 113–116
Theophylline reversal of alkylator-induced replicon initiation inhibition: no correlation with DDP-induced cytotoxicity (MRLett 0611)
by Jonathan M. Ducore and Barry S. Rosenstein (Dallas) 117–121
Measurement of genotoxic activity in multiple tissues following inhalation exposure to dimethylnitrosamine (MRLett 0613)
by David J. Doolittle, Edilberto Bermudez, Peter K. Working and Byron E. Butterworth (Research Triangle Park) .. 123–127

Announcement 129

Erratum 130

Occurrence of mutagens in canned foods (MRLett 0620)
by C.A. Krone and W.T. Iwaoka (Seattle) 131–134
Protective effect of R-factor plasmid pKM101 on lethal damage by UV and chemical mutagens in *E. coli* strains with different DNA-repairing capacities (MRLett 0622)
by Tatsuo Nunoshiba and Hajime Nishioka (Kyoto) 135–139
The quantitative structure – activity relationship approach to the mutagenicity of *N*-nitrosomethylaniline compounds (MRLett 0626)
by Kiyokatsu Jinno (Toyohashi) 141–143
Protection from toxic and mutagenic effects of H_2O_2 by catalase induction in *Salmonella typhimurium* (MRLett 0627)
by Lasse Winquist, Ulf Rannug, Agneta Rannug and Claes Ramel (Stockholm) 145–147
Adsorption of pyrolysate mutagens by vegetable fibers (MRLett 0628)
by Tsuneo Kada, Masayuki Kato, Katsuhiro Aikawa and Shuhachi Kiriyama (Mishima and Hokkaido) 149–152
Mutagenesis by *N*-nitroso compounds in *Salmonella typhimurium* TA102 and TA104: Evidence for premutagenic adenine or thymine DNA adducts (MRLett 0629)
by Joseph B. Guttenplan and You-Chiu Hu (New York) 153–159
Drug synergism or antagonism in the induction of diploid meiotic products in *Saccharomyces cerevisiae* (MRLett 0624)
by Silvio Sora, Cesare Rossi and Maria Luisa Agostoni Carbone (Milano) 161–164
A pilot experiment for the micronucleus test
The multi-sampling at multi-dose levels method (MRLett 0617)
by M. Hayashi, T. Sofuni and M. Ishidate Jr. (Tokyo) 165–169
Rifampicin-induced chromatid exchanges in Sarcoma-180 mouse ascites cells (MRLett 0621)
by A. Chaudhuri, M.M. Chaudhuri and S. Ghosh (Calcutta) 171–173
Sister-chromatid exchanges and chromosomal aberrations in lymphocytes of male albino rats treated with an alkylating agent, apholate (NSC 26, 812; ENT 26, 316) (MRLett 0623)
by Tariq M. Haqqi (Aligarh) 175–181
The effect of diphenylhydantoin on the frequency of micronuclei in bone-marrow polychromatic erythrocytes of mice (MRLett 0630)
by Roberto Montes de Oca-Luna, Carlos H. Leal-Garza, Susana Baca-Sevilla and Raul Garza-Chapa (Monterrey, Nuevo Leon) 183–187
A new method for sister-chromatid exchange studies in vivo, a single injection of BrdU melted agar (MRLett 0632)
by S. Qin and C.C. Huang (Buffalo) 189–193
Genetic effect of chronic exposure of male mice to γ-rays (MRLett 0618)
by M.D. Pomerantseva, P.V. Goloshchapov, G.A. Vilkina and V.A. Shevchenko (Moscow) 195–200

Cytogenetic effects of sulphadiazine and sulphaguanidine on mitotic cells of male mice (MRLett 0625)
by Dwarkanath K. Murthy and S. Subramanyam (Hyderabad) 201–204
Microcomputer programs for mutation studies using the Fisher exact test or the binomial approximation (MRLett 0631)
by Clifford Forbes (Moscow, ID) 205–210

Letter to the Editor
The role of oxygen-free radicals and their secondary production by PMN − A response (MRLett 0633)
by Mira Barak (Haifa) 211

Contents, Vol. 141 (1984) 213–215
